

karin meijer - ceramics

Karin Meijer is a ceramic artist. She lives and works in Ramdala Gamla Skola outside of the town of Karlskrona, Sweden. She was

educated at University College of Arts, Crafts and Design (Konstfack), Stockholm, in ceramics and glass (1990-93 and 1995-96). Karin works lightly and willfully in high-temperature burnt clay, pottery or stoneware. Small series of articles for everyday use and unique objects with playful decorations and in bright colors.

"I usually work in fluid clay, castable. I like the fragile but still solid expression in the piped and openwork ceramic shapes. The rhythm in the piping is vital."

In public commissions, the clay takes turns with concrete and water cut sheet metal.
